

Master of Science in Engineering and Technology Management Louisiana Tech University Six Sigma Greenbelt Certification

A Louisiana Tech University Six Sigma Greenbelt Certification can also be obtained by successfully completing INEN 514 Statistical Analysis for Six Sigma and ENGR 566 Six Sigma and Quality Control with a B or higher.

Acquiring a greenbelt certificate not only enhances a professional skill set, but also improves an individuals' marketability for obtaining competitive positions with successful organizations and companies.

According to the American Society for Quality's *Quality Progress*, December 2011, a Green Belt is an individual who "operates in support of or under the supervision of a Six Sigma Black Belt, analyzes quality problems and is involved in quality improvement projects."

Included in that December issue is also a salary survey that states, "U.S. respondents who completed any Six Sigma training earned \$12,642 more than those without it. For Canadian respondents that difference was \$10,335."
